

AINUL HAQ

ainulhaqsde@gmail.com | LinkedIn | GitHub | LeetCode

Professional Summary

B.Tech graduate in Computer Science & Engineering (Cyber Security) with experience in Software Development, Data Analysis, Python, Full-Stack Development and AI. Proficient in Python, SQL, C++, JavaScript, React.js, Node.js, Flask, REST APIs, MongoDB and MySQL. Skilled in building scalable, data-driven and Generative AI applications using LLM APIs, with expertise in data processing, API integration, databases and performance optimization. Focused on Data Analytics, Software Engineering, Backend Development and AI Engineering.

Education

B.Tech – Computer Science & Engineering (Cyber Security) 2022 – 2026
Pranveer Singh Institute of Technology, Kanpur - Percentage: 75%

Intermediate (Class XII) 2022
Children's Academy, Lakhimpur Kheri - Percentage: 68%

High School (Class X) 2020
Children's Academy, Lakhimpur Kheri - Percentage: 83%

Technical Skills

Programming Languages: Python, C++, Java, JavaScript

Frontend: HTML, CSS, React.js

Backend & API: Node.js, Express.js, Flask, REST APIs

AI/ML: Generative AI, LLMs, Prompt Engineering, Stable Diffusion, Replicate API

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Databases & Tools: MySQL, MongoDB, Git, GitHub, VS Code

Projects

AI-Powered Text-to-Image Generator | [GitHub](#)

Project Developer

- Spearheaded the design and development of an AI-powered text-to-image web application, integrating the Replicate API for low-latency image generation, resulting in a 35% reduction in processing time.
- Implemented input validation, API error handling, and asynchronous request processing, reducing failed API requests by approximately 40% in an AI-powered text-to-image generation application.
- **Technologies Used:** Python, Flask, Replicate API, Stable Diffusion XL (SDXL), HTML, CSS, JavaScript.

Telly Beans – Full Stack Food Delivery Platform | [GitHub](#)

Web Developer

- Designed and developed a scalable full-stack food delivery platform with JWT-based authentication, role-based access control, shopping cart functionality and end-to-end order management using React.js, Node.js, and Express.js.
- Built reusable React components and optimized MongoDB indexing, reducing API response time by 60% from 300ms to 120ms while improving application maintainability.
- **Technologies Used:** React.js, Node.js, Express.js, MongoDB, HTML, CSS, JavaScript.

Certifications

- Generative AI Fundamentals – Coursera (2026)
- Data Analytics Job Simulation – Forage (2026)
- Web Development Bootcamp – Udemy (2026)
- Programming in Python, C++, HTML, CSS & JavaScript – Infosys Springboard (2025)
- Ethical Hacking & Cybersecurity Workshop – IIT Delhi (2024)

Achievements

- Solved **400+ Data Structures & Algorithms (DSA)** problems across LeetCode, CodeChef, and GeeksforGeeks, strengthening algorithmic thinking and programming proficiency.
- Earned a **4-Star badge on HackerRank**, demonstrating strong proficiency in algorithmic thinking, coding fundamentals and competitive programming.
- Completed the **Ethical Hacking & Cybersecurity Workshop** at IIT Delhi, gaining exposure to cybersecurity concepts, ethical hacking practices, and secure software development fundamentals.

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Analytics, Operating Systems, Computer Networks and Software Engineering.
